

Junior R&D Cloud Engineer

R&D Engineer

Ref: QX- JOBS-CE-2022

Full time, permanent position.
Located in France.

Job description

Within the R&D DevOps team, you will assume a central position in the company's organisation. You will be in charge of the design and implementation of all the cloud architectures for all Quortex solutions. As such, you will be in constant interaction with all the R&D and Operations teams.

At Quortex, we push the cloud and Kubernetes to the limit, and innovation will be part of your daily life - be prepared for it !!

Responsibilities

- Design and specify cloud and Kubernetes architectures for our solutions
- Define and maintain the Infrastructure as Code
- Develop the applications required to orchestrate the solution
- Actively participate in the monitoring and innovation around Cloud topics
- Design and improve the integration and continuous deployment processes
- Ensure the economic efficiency of the deployed solution

Skills

- Knowledge of public cloud environments (AWS, Azure, GCP)
- Knowledge of Docker, Kubernetes, Terraform.
- Software development (Go, Python)
- Use and/or implementation of CI/CD tools
- Knowledge of OTT streaming technologies would be a plus

Experience

Ideally experience in Cloud and/or development topics
If not, willing to learn!

About Quortex

Quortex is an innovative fast-growing French start-up located in Rennes, in the heart of the video world, developing streaming solutions. Our products - relying on key patents – are based on an intelligent use of Cloud Nativeness and Quortex Just-In-Time greener unique concept.

Our customers are main European TV Channels, Sports leagues, streaming partners.

We're looking for talented, curious and inspired people who want to disrupt the way live content reaches billions across the world. At Quortex, we do believe that employees are the most valuable assets and we encourage them to come up and propose new ideas.

If you want to be part of the Quortex adventure, [join us!](#)
